## **OPEN LETTER TO EMPLOYEES OF BOMBARDIER:**

As you may be aware, Bombardier is supplying the Chinese Government with specially designed cars for the railway being built into Tibet . What Bombardier isn't saying is that this railway is considered by Tibetans, supporters and impartial observers alike, to be the single-most devastating project being carried out in Chinese-occupied Tibet today.

The Chinese Government has openly admitted the railway is a politically motivated project yet Bombardier Senior Management continues to defend its involvement. Tibetans are not asking Bombardier to resolve the conflict between China and Tibet, but they are asking Bombardier not to facilitate China's destruction of Tibet.

Tibetans want development, but as long as China continues its military hold on Tibet, projects like the railway will not benefit the vast majority of Tibetans. On the contrary, if this railway is allowed to proceed, it will threaten the very survival of the Tibetan people, their culture and their unique way of life.

**Please stand on the right side of history and support Tibet.**

**Talk to your co-workers, circulate a petition and let Bombardier CEO Laurent Beaudoin know your concerns. For more information and other ideas on how to help contact:**
